

PROUDLYENGINEERED
IN EUROPE

OUR VISION

Together for an Innovative, Resilient
Electronics Industry

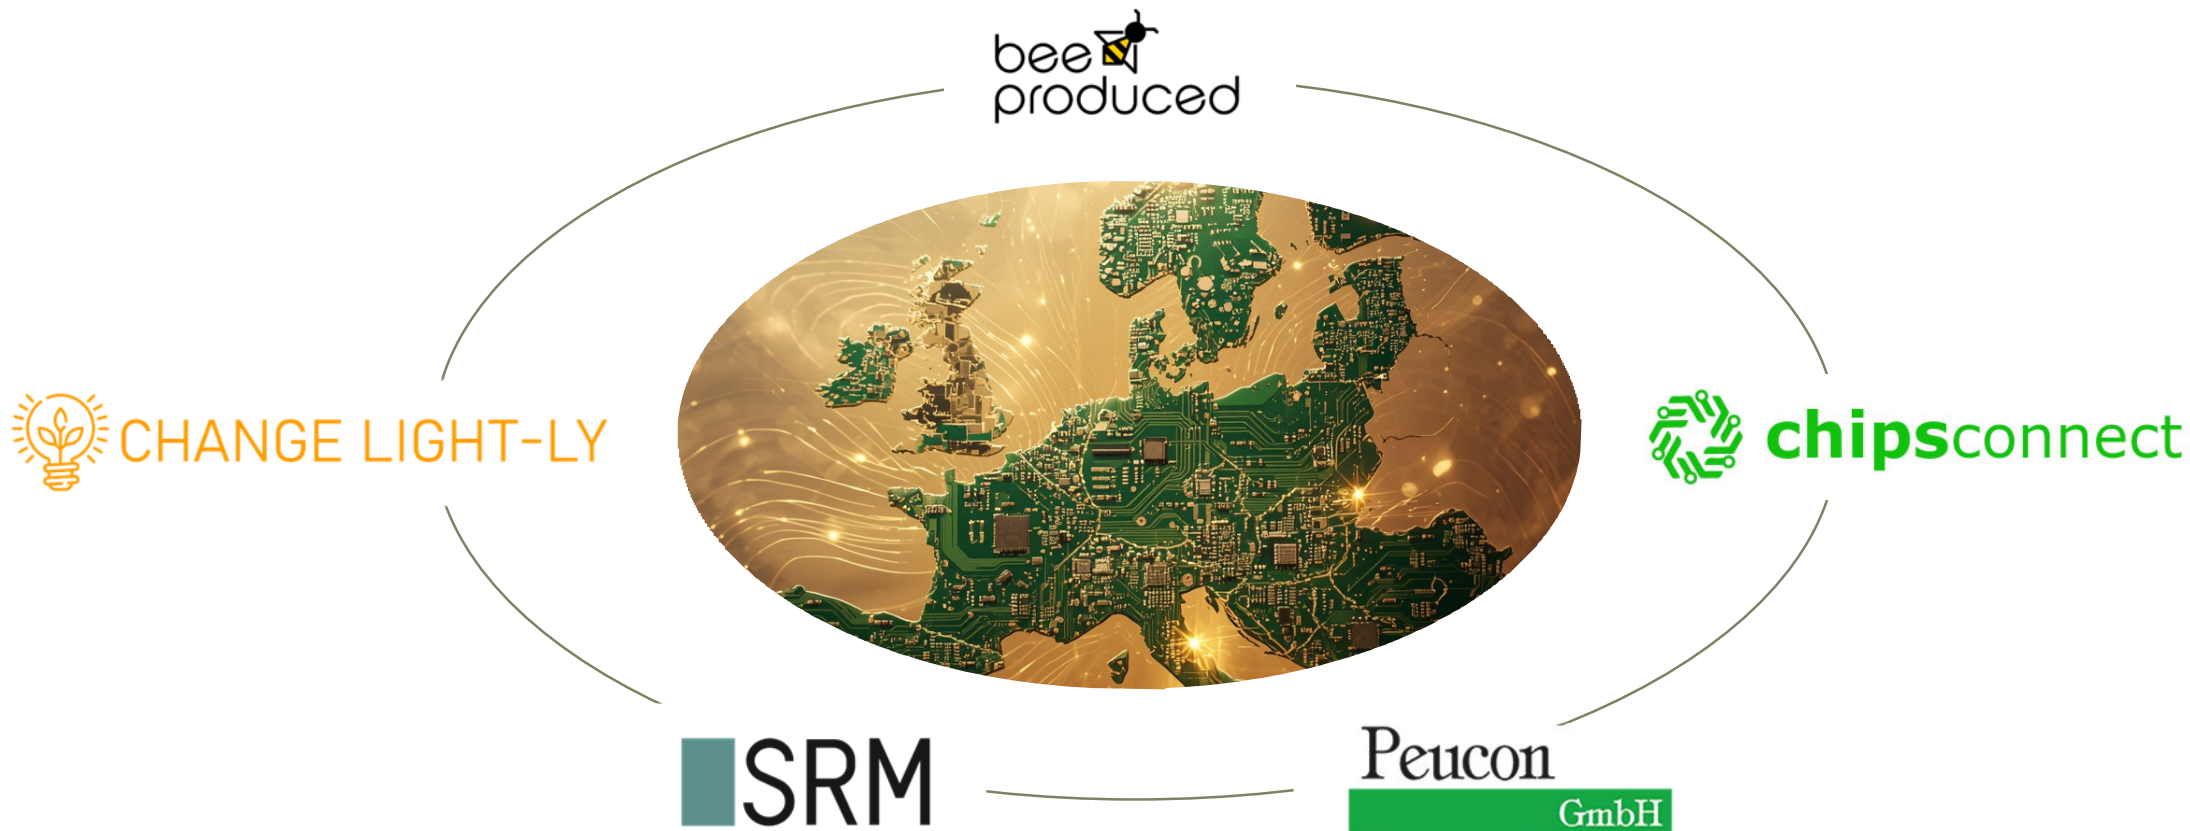

Creating a Sustainable Future for a Sovereign European Electronics Industry

- Strengthening **European supply chains** through strategic partnerships
- Accelerating **time-to-market** through streamlined processes and AI-powered tools
- Increasing the **global visibility** of Europe's electronics industry through targeted media and event activities
- **Empowering teams** for sustainable transformation through systemic industry understanding
- Development with a focus on **innovation, scalability, and sustainability**

These Factors Make It Special

- Customer-specific solutions of the highest **quality and product lifetime**
- Products for demanding **environmental conditions**
- Observation of all applicable **technical and legal specifications**
- Compliance with high **social and security standards**

Digitize your EMS experience with
AI-supported software tools!

- Marketplace for electronics manufacturing
- Customer portal for EMS
- Structured BOMs in seconds
- Automated pricing
- Easy quoting

Unlocking possibilities: Engineering
a smarter way of life

- Hardware & software development
- Software reverse engineering
- Embedded development
- Process informatics
- Test integration

E2MS – for reliable European
supply chains

- EMS for small & medium batch sizes
- Hardware & software development
- Prototyping service
- Hardware repair service
- Reverse engineering

Engineering the future. Managing the
transformation.

- Turnaround management
- R&D process optimization & digitization
- Product management
- European supply chains & reshoring
- Interim management

The exclusive digital ecosystem for
OEM & EMS.

- Component and information trading
- Collaboration
- Repair & Reuse
- Quality Assurance
- Supply Chain Consulting

COLLABORATION

RESPECT

INNOVATION

EUROPEAN SOVEREIGNTY

SUSTAINABILITY

HUMANITY

RESPONSIBILITY

What unites us

- Every partner is part of the beating heart of the **European electronics industry** — from design and manufacturing to R&D, supply chain, and beyond.
- What unites us is a shared commitment to **collaboration, sovereignty, innovation, and sustainability**.
- We combine our strengths to deliver solutions that are engineered in Europe, for Europe — proving that joint forces across borders, can build a **more resilient, competitive, and future-ready industry**.

PROUDLYENGINEERED

IN EUROPE

CENTRÁ, PRIESTORY, LABORATÓRIÁ A
INKUBATÓRY

A strong network for European innovation, that empowers sovereignty through sustainability

Welcome to our cooperation of passionate European electronics companies dedicated to fostering and celebrating the

- Innovation
- craftsmanship, and
- technical excellence
- that define European engineering.

Become part of our network!

Whether you're an engineer, technical service supplier or manufacturer who values the impact of European innovation and design, this collaboration is for you.

Shared visibility &
branding

Collaborative
customer acquisition

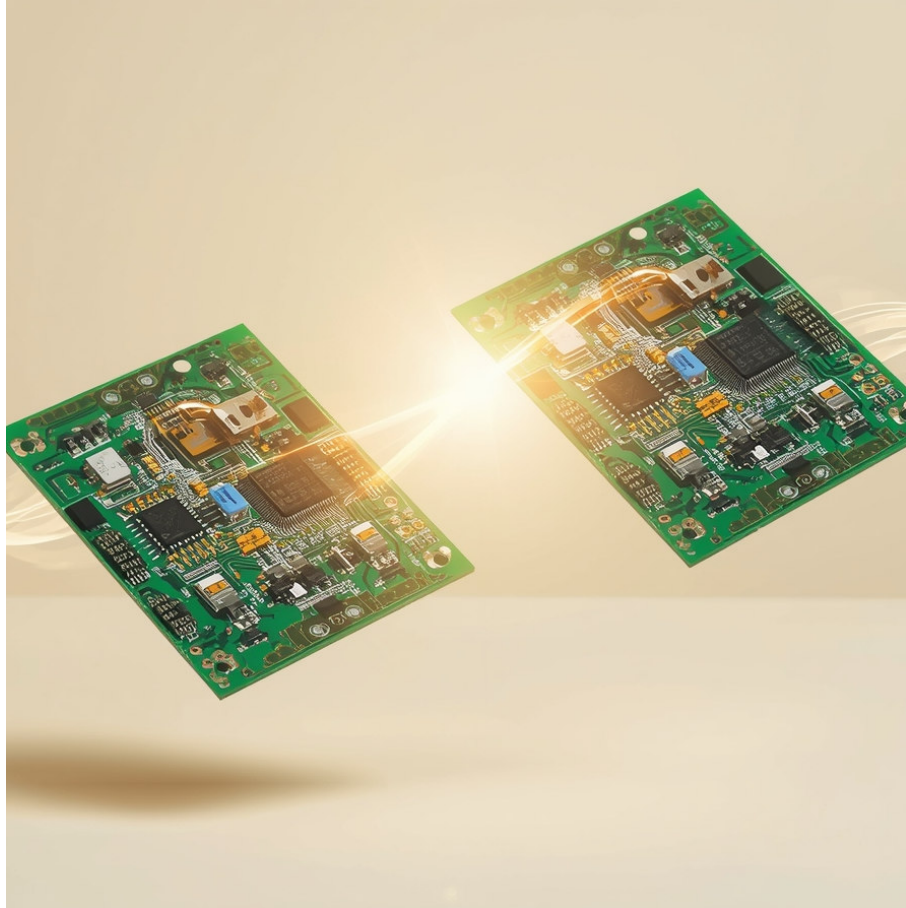

Greater market
reach

Scalable business
models

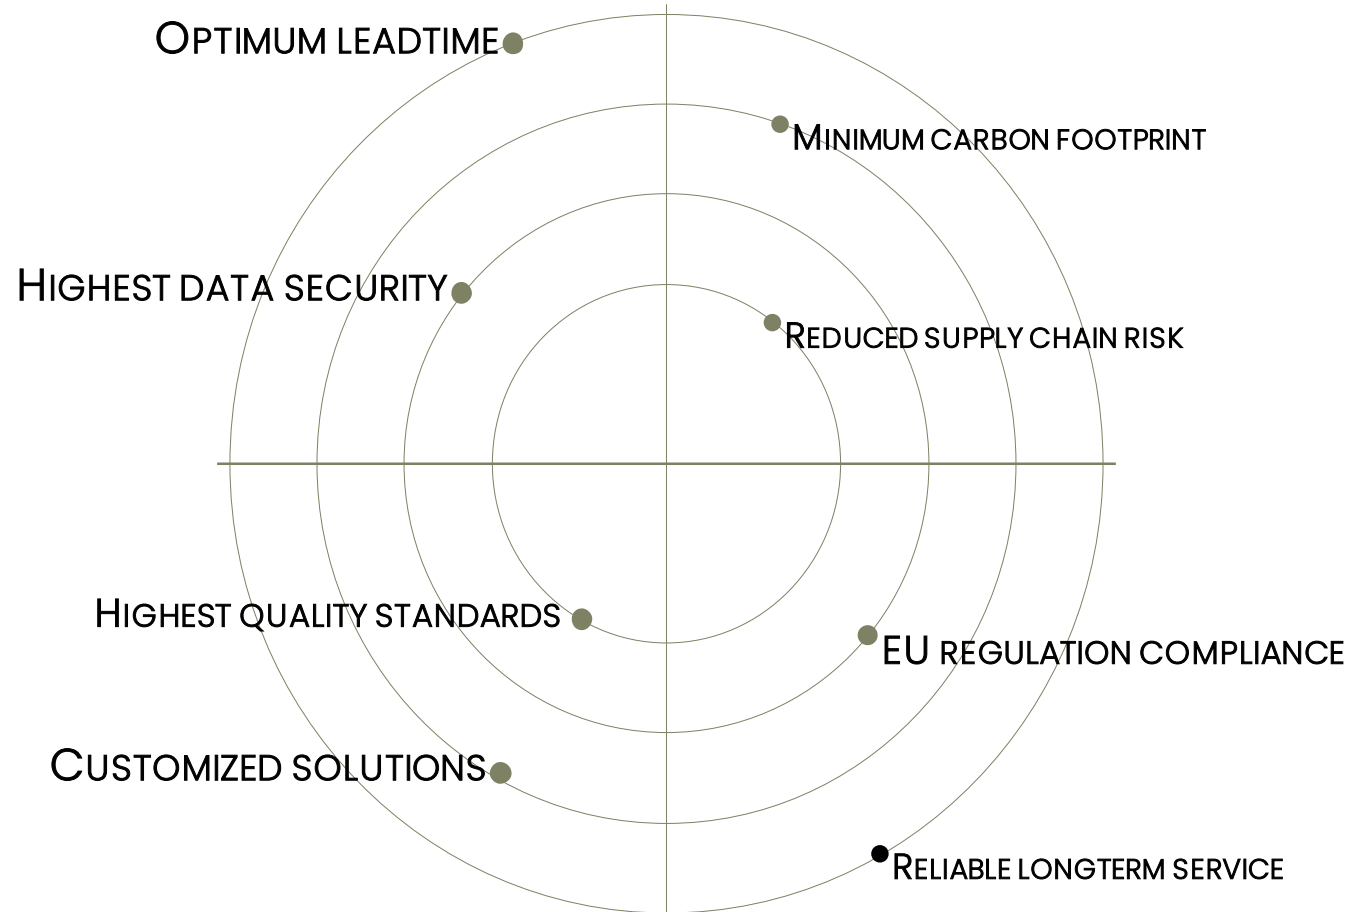

Valuable industry
knowledge & insights

We provide

- Groundbreaking European **engineering projects and innovations**
- Local **European knowledge** in a global context
- **Success stories** of European-made products and technologies
- Sustainable & forward-thinking **engineering practices**
- Connections with **like-minded professionals** and enterprises
- Discussions on the **future of European engineering** on the global stage

PROUDLYENGINEERED

IN EUROPE

Europe

- Low carbon footprint
- High data security
- Low supply chain risk
- Short leadtime
- Customized solutions
- Compliance with EU regulations
- Longterm service

Overseas

- High carbon footprint
- Low data security
- High supply chain risk
- Long leadtime
- Mass production
- Compliance risk
- No/shortterm service

Christian Leven

Expert for European Electronics & Innovation

DACH
